GOLDEN ARROW (Pruitt)

A true light yellow with 18 buds, 8 florets open, 6 showing color. Grows 60 inches in the field, always straight. Formal type; the 5½-inch florets are well placed and firmly attached to stem. The buds, as they start to show color, are true yellow, and do not have the green cast as is common with most yellow Glads. Extremely healthy and vigorous, the foliage is very dark green. This is the yellow the commercial grower has been hoping for. Germination and propagation are excellent. Opens fine when cut tight and hot weather does not bother this Glad. Blooms in 85 days. Champion Three-Spike Seedling at the 1946 Springfield, Illinois, show.

Retail: No. 1, \$3.00 each. No. 2, \$2.50 each. No. 3, \$2.00 each. Bulblets, 50 cents or 10 bulblets for \$4.00.

BEACON

INTRUDER (Graff 1944)

Intruder is correctly named as the king of the scarlets. It grows to a medium height of about 55 inches, with 18 to 20 buds on a flower head ranging from 28 to 30 inches. The florets are large, measuring up to six inches with eight to nine open. When cut tight in bud there are usually 12 showing color. It opens well and will stand a lot of handling. The foliage is semi-drooping and of a yellow green color. The color is definitely scarlet with a small orange feather on the lower petal. It does not fleck and is symmetrical in form. The hotter the weather, the better it likes it and does not crook. We are not offering any bulblets this season.

Large \$3.00, Medium \$2.00, Small \$1.00.
Bulblets .25 each, 10 for \$2.00.

BENGASI (Cave-Graff '43)

Bengasi is a beautiful La France pink. The color deepens toward the edge of the petals and blends into a white throat in which may be seen four rose lines which resemble a feather.

It attains better than average height, 70 to 75 inches, when grown under normal field conditions. The flower head measures up to 36 inches. The six to six and one-half inch florets are wide open and firmly attached. There are 18 to 22 buds on a spike, with nine fully open and six showing color. The heavily ruffled florets, six inches in width, are of excellent texture. Bengasi will bloom freely from any size bulb. Blooms from bulblets in our garden were excellent and much larger than those grown from bulblets of other varieties. When cut tight in bud, every floret will open to the tip. The buds grow close to the stem.

A yellow green foliage is characteristic of the plant. Its general excellence and fine shipping qualities label it as an outstanding commercial.

Large \$5.00, Medium \$4.00, Small \$3.00.
Bulblets .60c each, 10 for \$5.00, 100 for \$40.00.

RED RASCAL (Graff 1945)

A 1945 introduction which has done very well for itself considering that there were not many large bulbs out last season. As its name implies, Red Rascal is a ruffled red, one shade darker than Intruder. There is a small white rib running down the center of the throat to the tip of the lower floret. Sometimes there are two of these. There is no flecking and the color reflexes are good. The florets measure over 5½ inches across, seven to eight will open, with six showing color. The buds are firmly attached to the stem. Placement and harmony are both excellent. The stem is medium heavy and straight. The flower head is 26-28 inches in length, the spike ranging up to 58 inches in height. There is no tendency toward disease of foliage or bulb. The flower does not burn in the sun and stands punishment and handling very well. As a seedling it won the 3-spike championship at the Wisconsin State show in 1943. Red Rascal is a worthy introduction to the red class. It blooms in about 80-85 days. Power of opening is great when cut tight in the bud, and it gives promise of being a good commercial.

Large \$5.00, Medium \$4.00, Small \$3.00.
Bulblets .60 each, 10 for \$5.00.

SILVER WINGS (Ritsema-Graff '45)

Silver Wings needs no introduction to the glad fan as it was one of the most noteworthy glads this past season in the States and also in Canada. It has the splendid characteristics of its parent, Picardy, from which it was segregated in 1939. Its show record has been outstanding and its commercial qualities are unlimited.

The spike stands 65 inches tall under cultural conditions. The stem is medium heavy and does not crook. The florets measure six inches across and are very ruffled.

Silver Wings possesses an ethereal beauty, which is enhanced by the glistening white sheen of its florets. What a beautiful sight to behold seven or eight of these charmingly ruffled florets open at one time, with the remaining buds showing color. A total of 18 to 20 buds open on a straight spike, every one opening to the very tip, a quality which gives it appeal as one of the best commercials. It has been a winner at all of the shows and enjoys the supremacy of its class.

Large \$3.00, Medium \$2.00, Small \$1.00.
Bulblets .30 each, 10 for \$2.40.
